### Features of iMP-900

- Slim Design Depth : 13.7 mm
- Multi-Codec CD Player Supports MP3, WMA, OGG and ASF formats as well as Standard Audio CD.
- Enhanced Battery Life

With MP3 or WMA files, the iMP-900 can play for up to 120 hours (Using the internal batteries and external battery pack). (External Battery Pack : AA Size x 4) (When using internal battery : 30hours)

- Firmware Upgradeable
   Provides the latest updated features via firmware upgrade.
- Graphic LCD supporting Multiple Languages- support 40 languages iMP-900 comes with 4 line graphic LCD which can support multiple languages (40 languages) including traditional and simplified Chinese.
- Built-in Recharging with Over Charge Protection Circuit Over Charge protection circuit prevents over powering the batteries. Discharging function helps to maximize battery life.
- iRiver Shock Free Anti-Shock System+ESP function Using exclusive iRiver anti-skip technology, the iMP-900 provides maximum skip protection by buffering your music before playback.
- Built in 6 Preset EQ Normal, Rock, Jazz, Classic, U Bass, Metal
- Xtreme EQ and Xtreme 3D Customize your own EQ with Xtreme EQ and enhance bass and surround sound with Xtreme 3D.
- FM Tuner

Auto scanning and frequency memory function make it easy for you to listen to the FM Radio.

- Recognize Discs in Packet Write or Multi session Format
- WinAmp Playlist support. iMP-900 supports Winamp M3U Playlists. (maximum 20 lists)
- GUI (Graphic User Interface) Menu System

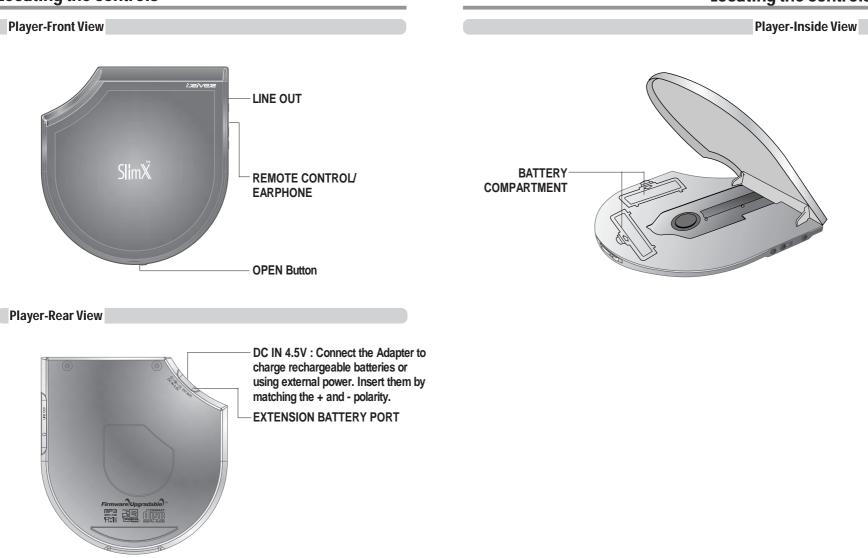

\* Accessories subject to change without notice and may vary from image shown.

Using the Controls

#### 13

**Using the Controls** 

### **Connecting player**

Using the External Battery Pack

#### **Charging with AC Adapter**

- 1 Use only the AC Power Adapter supplied with the player for safety.
- 2 Connect the AC adapter to the 5.0V DC jack on the player first and then into AC outlet. (AC adapter of this player is for 100~240V, 50~60Hz.)
- 3 The player will charge automatically when the player turns on after connecting the AC adapter to the player. (Refer to page 17~18 for details)

Using the rechargeable Batteries

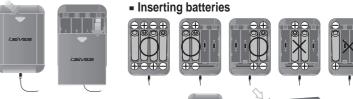

- 1 Open the battery cover on the inside of the player.
- 2 Insert rechargeable batteries(Stick type x 2ea) matching + and and close the battery cover.

When the battery level is low

00

- It beeps every 10 minutes. (Beep sound can be on/off. For details, please refer to page 54)
- iMP-900 may not function properly. Replacing battery or charging is recommended

Open the battery cover on the external battery pack as below figure.

2 Connect the external battery pack as shown in the right figure.

AA size battery x 4EA

- Do not use mixed with new batteries and used batteries.
- Do not use different types of batteries together.
- When the batteries are not to be used for a long time, remove them.
- If battery leaks, remove them.
- If battery leaks, wipe off any residue in the battery compartment and insert new batteries.
- Do not recharge a normal battery.
- The internal and external batteries are used simultaneously, the batteries can be charged according to batteries' condition.

#### Connect Remote control / Earphones

Connect remote control cable to the player as shown on below diagram.

Connect earphone to the earphones jack of remote control.

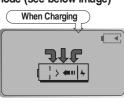

**Using the Controls** 

### **Connecting player**

#### **Recharging Method**

- Insert rechargeable batteries into the battery compartment of the player
- Connect the AC adapter to the player.
- **?** Press ▶∎ button to power on the player and then it starts to charge.
- It may be necessary to set the CHARGE FUNCTION to "CHARGE ON". (Refer to page 41)

5 Press and hold the button during playback to enter the standard charging mode (see below image)

- Once fully charged, charging is automatically stopped.
- The player automatically powers off when done charging. (except when charging during playback.)
- Once fully charged, the player will not try and charge the batteries.
- 🔍 Tip
- Charging/Discharging time (Estimated with the rechargeable stick batteries provided)

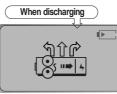

Charging : Approx. 4 hours (At full discharge) Discharging : Approx. 5 hours (At full charge)

• For long duration of battery life, we recommend selecting the Discharge/Charge function once a month.

- Discharge & Charge
- Connect the AC adapter to the player.

Install rechargeable batteries.

- Press ▶∎ button to power on the player and set the "CHARGE FUNCTION to DISCHARGE & CHARGE" to charge after discharging.(Refer to page 41)
- $I \Vdash \rightarrow \blacksquare \implies \blacksquare \implies \blacksquare \implies \blacksquare$  is scrolled when discharging during playback.
- 5 Press and hold the button during playback to enter the standard discharging mode (see below image)

- Using the Controls
- 6 After discharging is complete the player will switch to CHARGE mode and CHARGE function in the menu is changed to "CHARGE ON".

7 Once fully charged, charging is automatically stopped.

- The player automatically powers off when done charging. (except during playback.)
  - Q Tip
  - To make your batteries last longer.
  - Set the SORT to 'PHYSICAL ADDR"
  - Set the TAG INFORMATION to "OFF".
  - Set the EQ mode to NORMAL, ROCK, JAZZ or CLASSIC.
  - Set the BACK-LIGHTING time to the shortest possible.
  - Set the SHUFFLE mode to OFF.

### **Listening to Music**

## **Listening to Music**

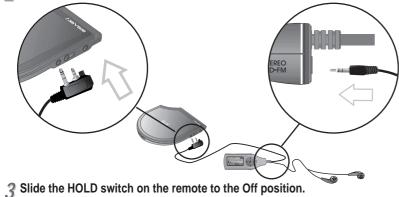

**Basic Operation** 

#### **Basic Operation**

Slide the open button on the side of the player and insert the disc with the disc label facing out. Close the lid.

2 Connect Remote Control and Earphones.

Slide the

Press the NAVI/MENU button to play. After powering on, the disc will play automatically.

- 5 Press the button to play music for pause and press it again to resume playback.
  - 6 Push the NAVI/MENU switch toward + or to adjust the volume.

- + 1 Push
- Push the NAVI/MENU switch toward a or be to skip to previous or next track.

Detailed Operation

- Push and hold the NAVI/MENU switch toward read or provide the navial set of the navia se
- Push and hold after pushing the NAVI/MENU switch toward I or I to skip to the previous or next folder.

#### NOTE

Refer to page 27 for details about searching the music.

### **Operating the FM Tuner**

## **Operating the FM Tuner**

Auto Scan function

Listen to FM radio (Frequency Range 87.5MHz ~ 108 MHz)

Press the NAVI / MENU button to power on the player. To switch to the FM Tuner, push and hold switch toward MODE/STEREO/CD-FM.

Push the NAVI/MENU switch toward Meter or Meter to select your desired station.

3 Push switch toward MODE/STEREO/CD-FM to select Stereo or Mono.

Push the NAVI/MENU switch toward + or - to adjust the volume.

5 Press the I button to Mute the radio. and press it again to release.

To Auto Scan for a station, release the PRESET mode by pressing the NAVI/MENU button. Push and hold the NAVI/MENU switch toward | 44 or >>>|. Find the station by scrolling | 44 or >>>|.

Finding a Station using PRESET Mode

<PRESET SETTING>

Example)

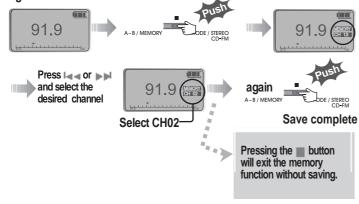

- FM tuner reception will be affected in weak reception areas.
- When player does not have any preset channels, EMPTY will be displayed at preset mode then fade out.

### **Operating the FM Tuner**

### **Operating the FM Tuner**

Memory function (Store favorite stations)

- 1 Push the Navi button to release PRESET mode, select the station by pushing the NAVI/MENU switch toward IMM or IMMIN.
- 2 Push the switch toward A-B/MEMORY to select a channel number to assign to the frequency. Push it toward A-B/MEMORY to save the station again.

3 Up to 20 channels can be memorized.

Auto memory function : (To save the Channels automatically)

Push the NAVI button to release PRESET, push the switch toward A-B/MEMORY. CH01 to CH20 will be saved automatically with the first 20 stations the player finds.

\* click

<sup>&</sup>lt;PRESET RELEASING>

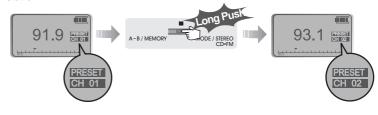

It may not be saved in weak reception areas.

Memory delete function (Delete saved channels)

1 Select channel to be deleted by pushing the NAVI/MENU switch toward is or be at preset mode.

# 2 Push and hold the switch toward A-B/MEMORY to delete the selected station.

3 The next channel will appear when channel delete is completed. Push and hold the ■ switch toward A-B/MEMORY. if you want to delete the next channel also.

Detailed Operation

- 3. To exit Xtreme EQ setting, press or NAVI/MENU button.

#### Xtreme 3D

You can adjust the level of 3D sound(minimum, Natural, and Maximum). You can extend 3D sound by selecting Bass Boost or 3D EQ. You can also adjust the level of 3D sound with the Idd or Image (or VOL +, VOL -) lever. Select DBE or 3D EQ with the NAVI/MENU button.

#### DBE Setting

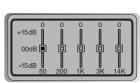

You can select the Bass Center Band level from Band 1 to 4. You can also set the Bass Boost gain from 0 dB to 15dB by 3dB step.

Select band 3 or 12dB with Volume + or Volume - button (If selected character is highlighted.) and adjust the level with the I or >>> (or VOL +, VOL -) button.

#### **3D EQ Settina**

You can adjust the sound to your preference. There are 5 band frequency steps, set from -15dB to +15dB by 3dB step.

#### NOTE Operation method is as same as it of Xtreme EQ.

#### ADAPTER VOLUME

35 ON : Volume will set to 35 when the AC adapter is attached. OFF: This function is not activated.

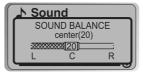

This feature is useful when connecting the player to your car or home stereo system.

### **MENU-Sound**

#### SOUND BALANCE

When Sound Balance bar is moved to L (Left, 0),the sound outputs at the left earphone. When the lever is moved to R (Right, 40) the sound outputs at the right earphone. The default value is 20 and the sound outputs the same level at both earphones.

#### **EQ LIMIT**

ON : Limit the control of equalizer frequency to prevent distortion of sound.

OFF : You can enjoy original sound though distortion may occur.

#### EQ SELECT

You can select various EQ modes. Press NAVI/MENU button after selecting EQ by using Idd or Immi (or VOL +, VOL -) switch.

You can not select NORMAL EQ.

 The adjusted EQ is automatically selected when you adjust the EQ setting even though you do not select Xtrm EQ or Xtrm 3D.

### **Using the Password**

**Changing the Password** 

#### **Setting the Password**

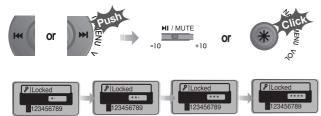

1 Select the menu you want on the 'MENU  $\rightarrow$  GENERAL  $\rightarrow$  Password''. (Refer to page 40)

If you select "ON" on the MENU → GENERAL → Password, the right screen is displayed after loading screen when you turn the player on.

Press I , I I (or Volume +, Volume -) to move the numeral and press the I or NAVI/MENU button to select it. The screen as below is displayed.

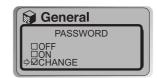

When the input password is correct, the above screen disappears and changes to Total screen. Press the PLAY button to start the playback.

If the password is wrong, the screen goes back to the input screen.

- The Password must input as 4 digits.
- The Password is initialized as "0000" when the firmware is upgraded.

1 Select "CHANGE" on the "MENU  $\rightarrow$  GENERAL  $\rightarrow$  Password".

2 Input the old password. (The initial password is '0000')

3 Input the new password of 4 digits.

# Input the new password of 4 digits to confirm once more.

#### NOTE

 If the password to change and the password to confirm are the same, the password is automatically changed to the new one and the playback screen is displayed on the LCD.

If you select "ON" on the password menu, you must input the new password to turn on the player.

- If the password to confirm is different from the changed password, the password screen goes back to the Confirm screen.
- Press the STOP button to exit changing the password, and the old password is preserved.
- The Password is initialized as "0000" when the firmware is upgraded.

### **Firmware Upgrade**

Player

#### **Upgrading Firmware**

## Firmware Upgradable

Upgrade your firmware at www.iRiver.com.

What is FIRMWARE?

It is the operating system that works in the iMP-900. iRiver provides you with the latest and best features through Firmware Upgrade. Visit www.iRiver.com to upgrade your Firmware.

#### How to UPGRADE?

- 1. Download the latest firmware upgrade file from www.iRiver.com.
- 2. Execute the file after extraction.
- Burn the iMP-900 HEX file to a CD (be sure there are no other files on this CD.
- Connect the power adapter to the iMP-900. (Note : Upgrade the firmware after connecting the adapter)
- 5. Insert the CD into the iMP-900 and play the CD.
- 6. Check whether your LCD window shows 'Firmware Upgrade"
- 7. When the power goes off automatically, the upgrade is done.
- 8. Play your Music Disc and confirm the firmware version information displayed during loading.

- How long does Anti-Shock last?
- With MP3 files (128Kbps, 44.1Khz), Anti-Shock lasts up to 480 seconds. With Audio CD, you can set it up to 40 or 160 seconds.
- Mechanical noise is heard from the player.
- A When loading a CD or searching music, CD Pick-up makes noise moving at high speed. This is not a malfunction. But if you hear mechanism noise through earphones or hear excessive noise from the player, contact iRiver Customer Service.
- ODoes using CD's created on a computer reduce the life of the Lens?
- A There is no connection between using a disk created on a home computer and the lifetime of the lens.
- Why doesn't the player recognize a CD created at high speed?
- A In general, it is recommended to record the CD with 1~2 level lower than the highest speed if you are experiencing playback difficulties.

Additional Information

### **Questions and Answers**

Recordina

#### Recording

How do I copy MP3 files on to a CD?

You need to record MP3 files onto a CD-R or CD-RW disc to play in the iMP-900.

In general, there are two kinds of blank CDs. CD-R (CD Recordable): Recordable but not erasable.

CD-RW (CD-ReWritable) : Recordable and can be used again after erasing.

There are several ways to burn a CD. A CD is created in sessions.

Single session: Close session after burning once. Multi session: Do not close session after burning. More data can be written to the disk later.

This iRiver player can play packet-written CD RW's as well.

- What do I need to burn MP3 files?
- A You need a CD recorder, recording software program, and a blank CD. For details, refer to the "SUPPORT" at iRiver's homepage.
- How do I make a CD from a tape or record?
- ▲ To convert the tape's information into CD requires many items, including:
- A player to play the tape or record, a stereo cable to attach the player to your computer, and third party recording software to capture and edit the audio. Connect the stereo cable from the source to the line-in input on your computer sound card; then use the third party software to record and edit the audio on the tape or record.

Once the music is recorded onto your computer, use a program to copy the music in Audio or MP3 format to a CD.

I recorded an MP3 CD but I only see less than 20 songs.

The CD was probably created as an Audio CD's will only hold about 15~20 songs. To record a CD full of MP3's be sure to set your CD creation software to record Data.

- The player can't read songs and I get 'No disc' message.
- CD readability depends on several factors:
- 1. CD-Media
- 2. The Burning/Recording Speed
- 3. The CD surface

When you create a CD, burning speed does matter as well as CD surface. When you create a CD at a high speed, the data writing may not be reliable. In that case, it is recommended to create a CD at a lower speed or to use brand name media.

Can I add songs to the CD I already burned?

Using multi-session or packet writing allows you to add songs to the CD.

### **Questions and Answers**

Playing

#### Playing

- How do I listen to a spot on the track I last listened to?
- A The iMP-900 provide a RESUME function. Go to Function, General and enter into RESUME menu. You can set Track Time or Track #. The iMP-900 can remember the last 10 CDs you played.
- O How many playlists can the iMP-900 play?
- ▲ The iMP-900 can play up to 20 playlists(\*.m3u)
- How many songs can the iMP-900 play?
- A The iMP-900 can recognize 999 songs (20 Playlist included) and 255 folders including subfolders.
- Does the iMP-900 play " .ra"and " .wav" formats?
- A The playable formats on the iMP-900 are MP3, WMA, and ASF files.
- RA, WAV, and other formats can not be played in this player. Supporting formats such as ".ra" and ".wav" are under consideration for the future.
- I don't see the title and it only displays Audio Track.
- The iMP-900 can display the information that the song contains. With MP3 files,
- the tag information may not be correct and with Standard Audio CD, it displays only Audio Track.

To see the song title, you need to burn the CD using CD-TEXT function. See your CD Creation software.

- The sound cuts out when the player skips.
- If the player is shaken in a sudden or violent manner, or shaken excessively, skipping may occur. Under normal circumstances, skipping will not occur. Please carry and handle the player under normal circumstances (i.e., without excessive shaking).

- It takes a long time to load a CD.
- 4 Using Multi-sessioned or Packet Written CD may affect the loading time rather than using Single sessioned CD because the data is scattered in the CD. To reduce the loading time, it is recommended you to burn in Single-session. You may contact Customer Service if it takes longer than 1 minute to load a single-sessioned CD or a Standard Audio CD.

It always stops after playing one song.

- Check that the "Auto Pause" feature is turned off.
- A Also check that your player is not set to "SFL 1" mode.
- I hear a 'hiccup' sound while the song is playing.
- A 1 Check the status of the file. What is likely happening is that the file is corrupted, especially if you hear the same sound in the same spot. In this case, the music file is maybe corrupted.
- A2 Check whether the sampling frequency and bitrate of the music file is too high or low. iMP-900 supports from 8KHz, 8Kbps to 44.1KHz, 320Kbps. (In case of 48KHz, supports up to 256Kbps.)
- O Can I change the playing order?
- A The iMP-900 supports m3u file lists. Also, the Program function allows you to select your preferred songs.
- Is the sound better if I convert an MP3 file into WAV?
- A MP3 is a compressed a audio format. Audio quality is lost when converting sound into MP3 format. Changing MP3 to WAV files will not restore data lost in compression and will therefore not improve audio quality.

Additional Information

### **Questions and Answers**

#### Playing

- What kind of media can the iMP-900 support?
- A Standard Audio CD (8Cm, 12 Cm), CD-R, CD-RW DATA CD with MP3, ASF and WMA.

The iMP-900 also supports Mixed CD (Data Track + Audio Track), CD-Extra (Audio Track + Data Track), Multi-sessioned and packet written CD.

What is VBR?

A VBR is "Variable Bit Rate". Some MP3 encoders support VBR. When enabled, the compressor will use a bit rate that will fit the actual passage. If it is a complex part, having much more variation in the sound, it will use a high bit rate. If there is less variation in sound, it will use a lower bit rate. Usually, the average bit rate will not be as high as a same-quality MP3 with CBR (Constant Bit Rate). However, there is shortcoming that it's hard to keep track of the actual position that may not be favorable when studying language.

Should any problem continue after you have checked these symptoms, please contact iRiver customer support.

Player will not power on	<ul> <li>Check whether the batteries have been inserted in proper polarity (+ and -).</li> <li>Check whether the HOLD switch on remote is ON (Switch to OFF position)</li> <li>Check whether the player door is opened.</li> <li>Check whether the rechargeable batteries are not charged or the batteries ran out.</li> </ul>
Loading stopped or 'No DISC' displayed on LCD	<ul> <li>Check whether the CD is dirty or defective (clean it or change to new CD).</li> <li>Check whether the CD is inserted properly.</li> <li>Check to be sure the optical lens is clean. (Gently wipe with soft cloth.)</li> <li>Check whether moisture condensation has occurred (leave the CD player aside for several hours until the moisture evaporates).</li> <li>Make sure there is a CD in the player.</li> <li>Problems can be caused by the CD creation process on your PC. Re-record the disk at a slower speed.</li> <li>Use Full Format when creating packet a written disk.</li> </ul>
No Sound or noise is heard	<ul> <li>Check whether VOLUME is set to '0".</li> <li>Connect the earphone/remote plug firmly.</li> <li>Check whether the plug is dirty (clean the plug with a dry and soft cloth).</li> <li>Corrupted MP3, WMA file may have distortion or not play. Try playing another music file.</li> <li>Excessive jolting may affect MP3, WMA, and audio CD disks during playback.</li> </ul>

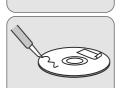

### Troubleshooting!

On Handling Disc

Should any problem continue after you have checked these symptoms, please contact iRiver customer support.

AC adapter does not work.	<ul> <li>Check whether the plug is connected to the proper jack on the player.</li> </ul>
Remote control does not work.	<ul> <li>Check whether the HOLD switch is ON. (Switch to OFF position.)</li> <li>Connect the earphones/remote plug firmly.</li> </ul>
Battery Life is short	<ul> <li>Ensure the rechargeable batteries are fully charged.</li> <li>Avoid the excessive operation of remote control.</li> </ul>
Characters in LCD are corrupted.	■ Check out Menu → General → Language and confirm whether the right language has been selected. (Refer to page 40.)
Poor FM Reception	<ul> <li>Adjust the position of the player and remote control.</li> <li>Electronic equipment can case interference with the FM reception. Turn off any nearby electronics or move the player away from the source.</li> </ul>
charging and discharging does not work.	<ul> <li>Check whether the adapter plug is properly connected.</li> <li>Check whether the batteries inserted are rechargeable.</li> <li>Check whether 2 rechargeable batteries are inserted. The batteries is charged and discharged when 2 batteries are inserted.</li> </ul>

 $\bigcirc$ 

Do not stick papers or tape labels onto the surface (bright side).

Avoid touching the surface (bright side) where

Avoid cleaning the disc surface. If necessary, clean the disc surface with a soft cloth following

Avoid using chemicals to clean the surface.

#### On safety

 Should any solid objects or liquid fall into the player, unplug it and have it checked by qualified personnel before operating it any further.

On handling Disc

data is stored.

Disc Cleaning

the directions described.

- Do not put objects in the DC IN 4.5V jack (External Power output).
- Use only the adapter provided with the player.

Additional Information

### **Precautions**

- During playback, dirty or scratched CD's may cause audio distortion or skipping.
- Tracks with damaged or corrupted parts are skipped or forwarded to next track.
- Supported file types will have the extension MP3, WMA and ASF.
- Folders and files are sorted in alphabetical order. Use Navigation mode to select the tracks wanted.
- Total 255 folders and 999 tracks (Including 20 playlist) within a disc can be recognized.
- Track information displayed is either filename or ID3 TAG information.
- CD-TEXT discs are displayed with track names within the TOC (Table of Contents) of the disc.
- Maximum playback time is 120 hours with fully charged internal batteries and the external battery pack attached.
   (When playing Audio CDs, maximum playback time is 50 hours.)
   (Reference : MP3, 44.1KHz, 128kbps, Volume Center)
- Battery level indicator may vary depending on battery type and operation mode.

- To shorten the reading time of CD...
- Set the 'MULTI SESSION" to 'OFF".
- Create CDs at a slower speed.

### **Safety Warning**

Safety Warning

#### Federal Communications Commission (FCC)

The device manufactured and found to comply with limits for a Class B computing device according to the specifications in FCC rules Part 15. Operation is subject to the following two conditions;

- 1. This device may not cause harmful interference, and
- 2. This device must accept any interference received, including interference that may cause undesired operation.
- 3. If your device needs repairs, you must arrange for the manufacturer to make them if you are to keep the device's FCC registration valid.

This equipment, like other electronic equipment, generates and uses radio frequency energy. If not installed and used according to the instructions in this manual, this equipment may cause interference with your radio and television reception.

If you think this equipment is causing interference with your radio or television reception, try turning the equipment off and on. If the interference problems stop when the equipment is switched off, then the equipment is probably causing the interference. You may be able to correct the problem by doing one or more of the following:

- Adjust the position of the radio or TV antenna
- Move away the device from the radio or TV

If necessary, consult your dealer or an experienced radio or television technician. You may find this booklet helpful:"How to Identify and Resolve Radio and TV Interference Problems"(Stock No. 004-000-00345-4), prepared by the FCC and available from the U.S Government Printing Office, Washington, DC 20402. See individual devices FCC ID and registration numbers.
